ENGINEERED

Engineered wood floor represents all the traditional aesthetics of solid hardwood, with an innovation of design that makes it even more versatile! Comprising of several layers, the top layer being a species of real hardwood, engineered hardwood flooring is a robust flooring option that allows you to install your chosen color, cut, finish and surface texture.

The core layer of engineered hardwood is made up of pine, which allows the engineered flooring to expand and contract with changing temperature and moisture levels without affecting floor. Available in colors ranging from dark chocolate brown color and walnut, the product allows easy maintenance and is ideally suited for a house and office

- Multi layered structure makes it dimensionally stronger.
- Versatile, can be used for both traditional & modern settings.
- UV Acrylic with anti scratch top coat with protects the surface.
